

Safer Internet Day 2026

AI describes technology and computer systems that have been designed to complete tasks that would have previously required human thinking.

How many examples of AI use can you think of?

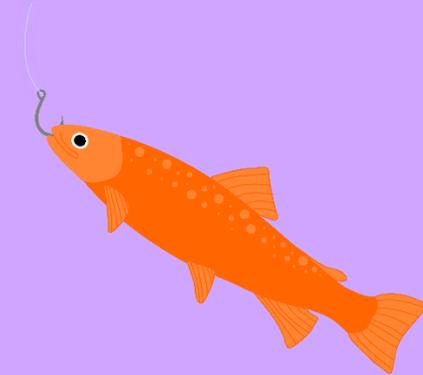

How is AI being used?

Detecting illegal logging in the Amazon

Guiding brain surgeons

Tracking sustainable fishing

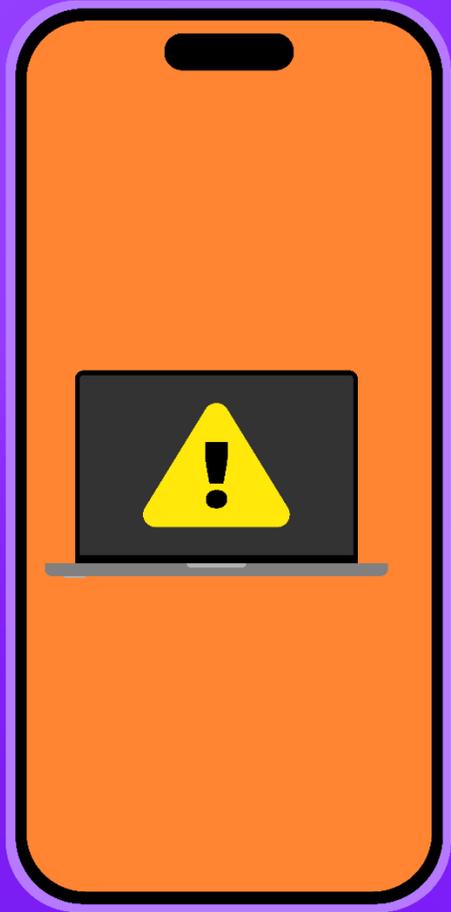

Translating stories into sign language

Analysing honeybee hives

AD)))

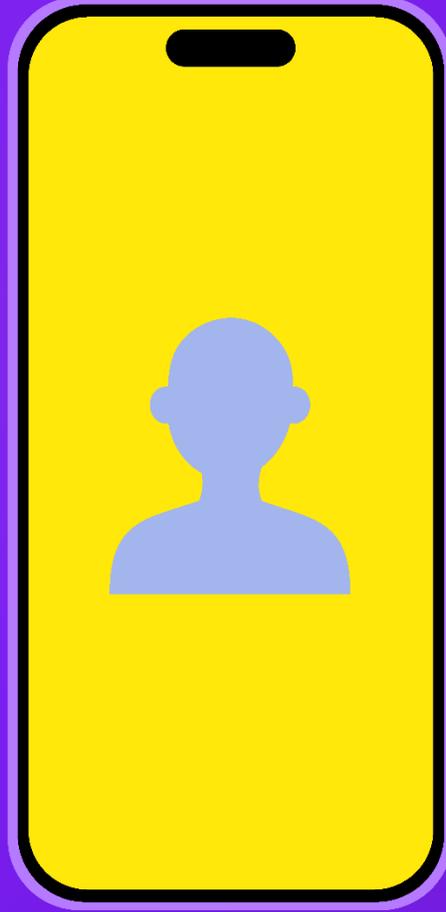

Narration for people with visual impairments'

Replacing jobs?

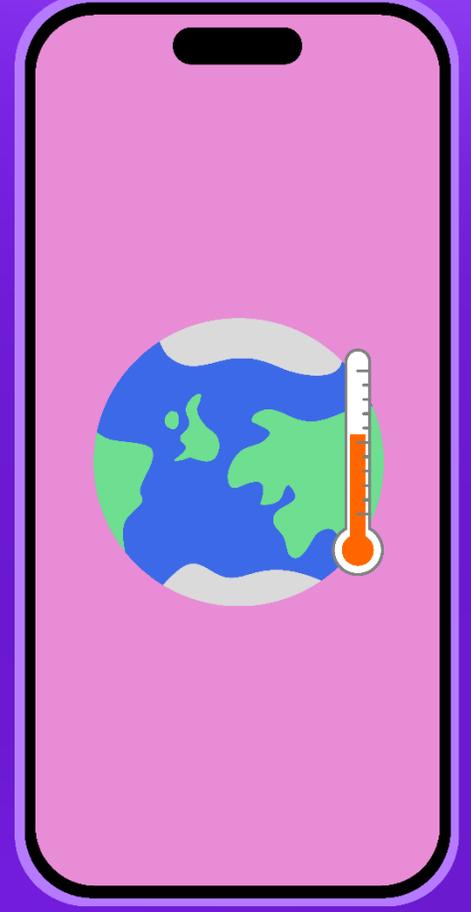

Completing coursework?

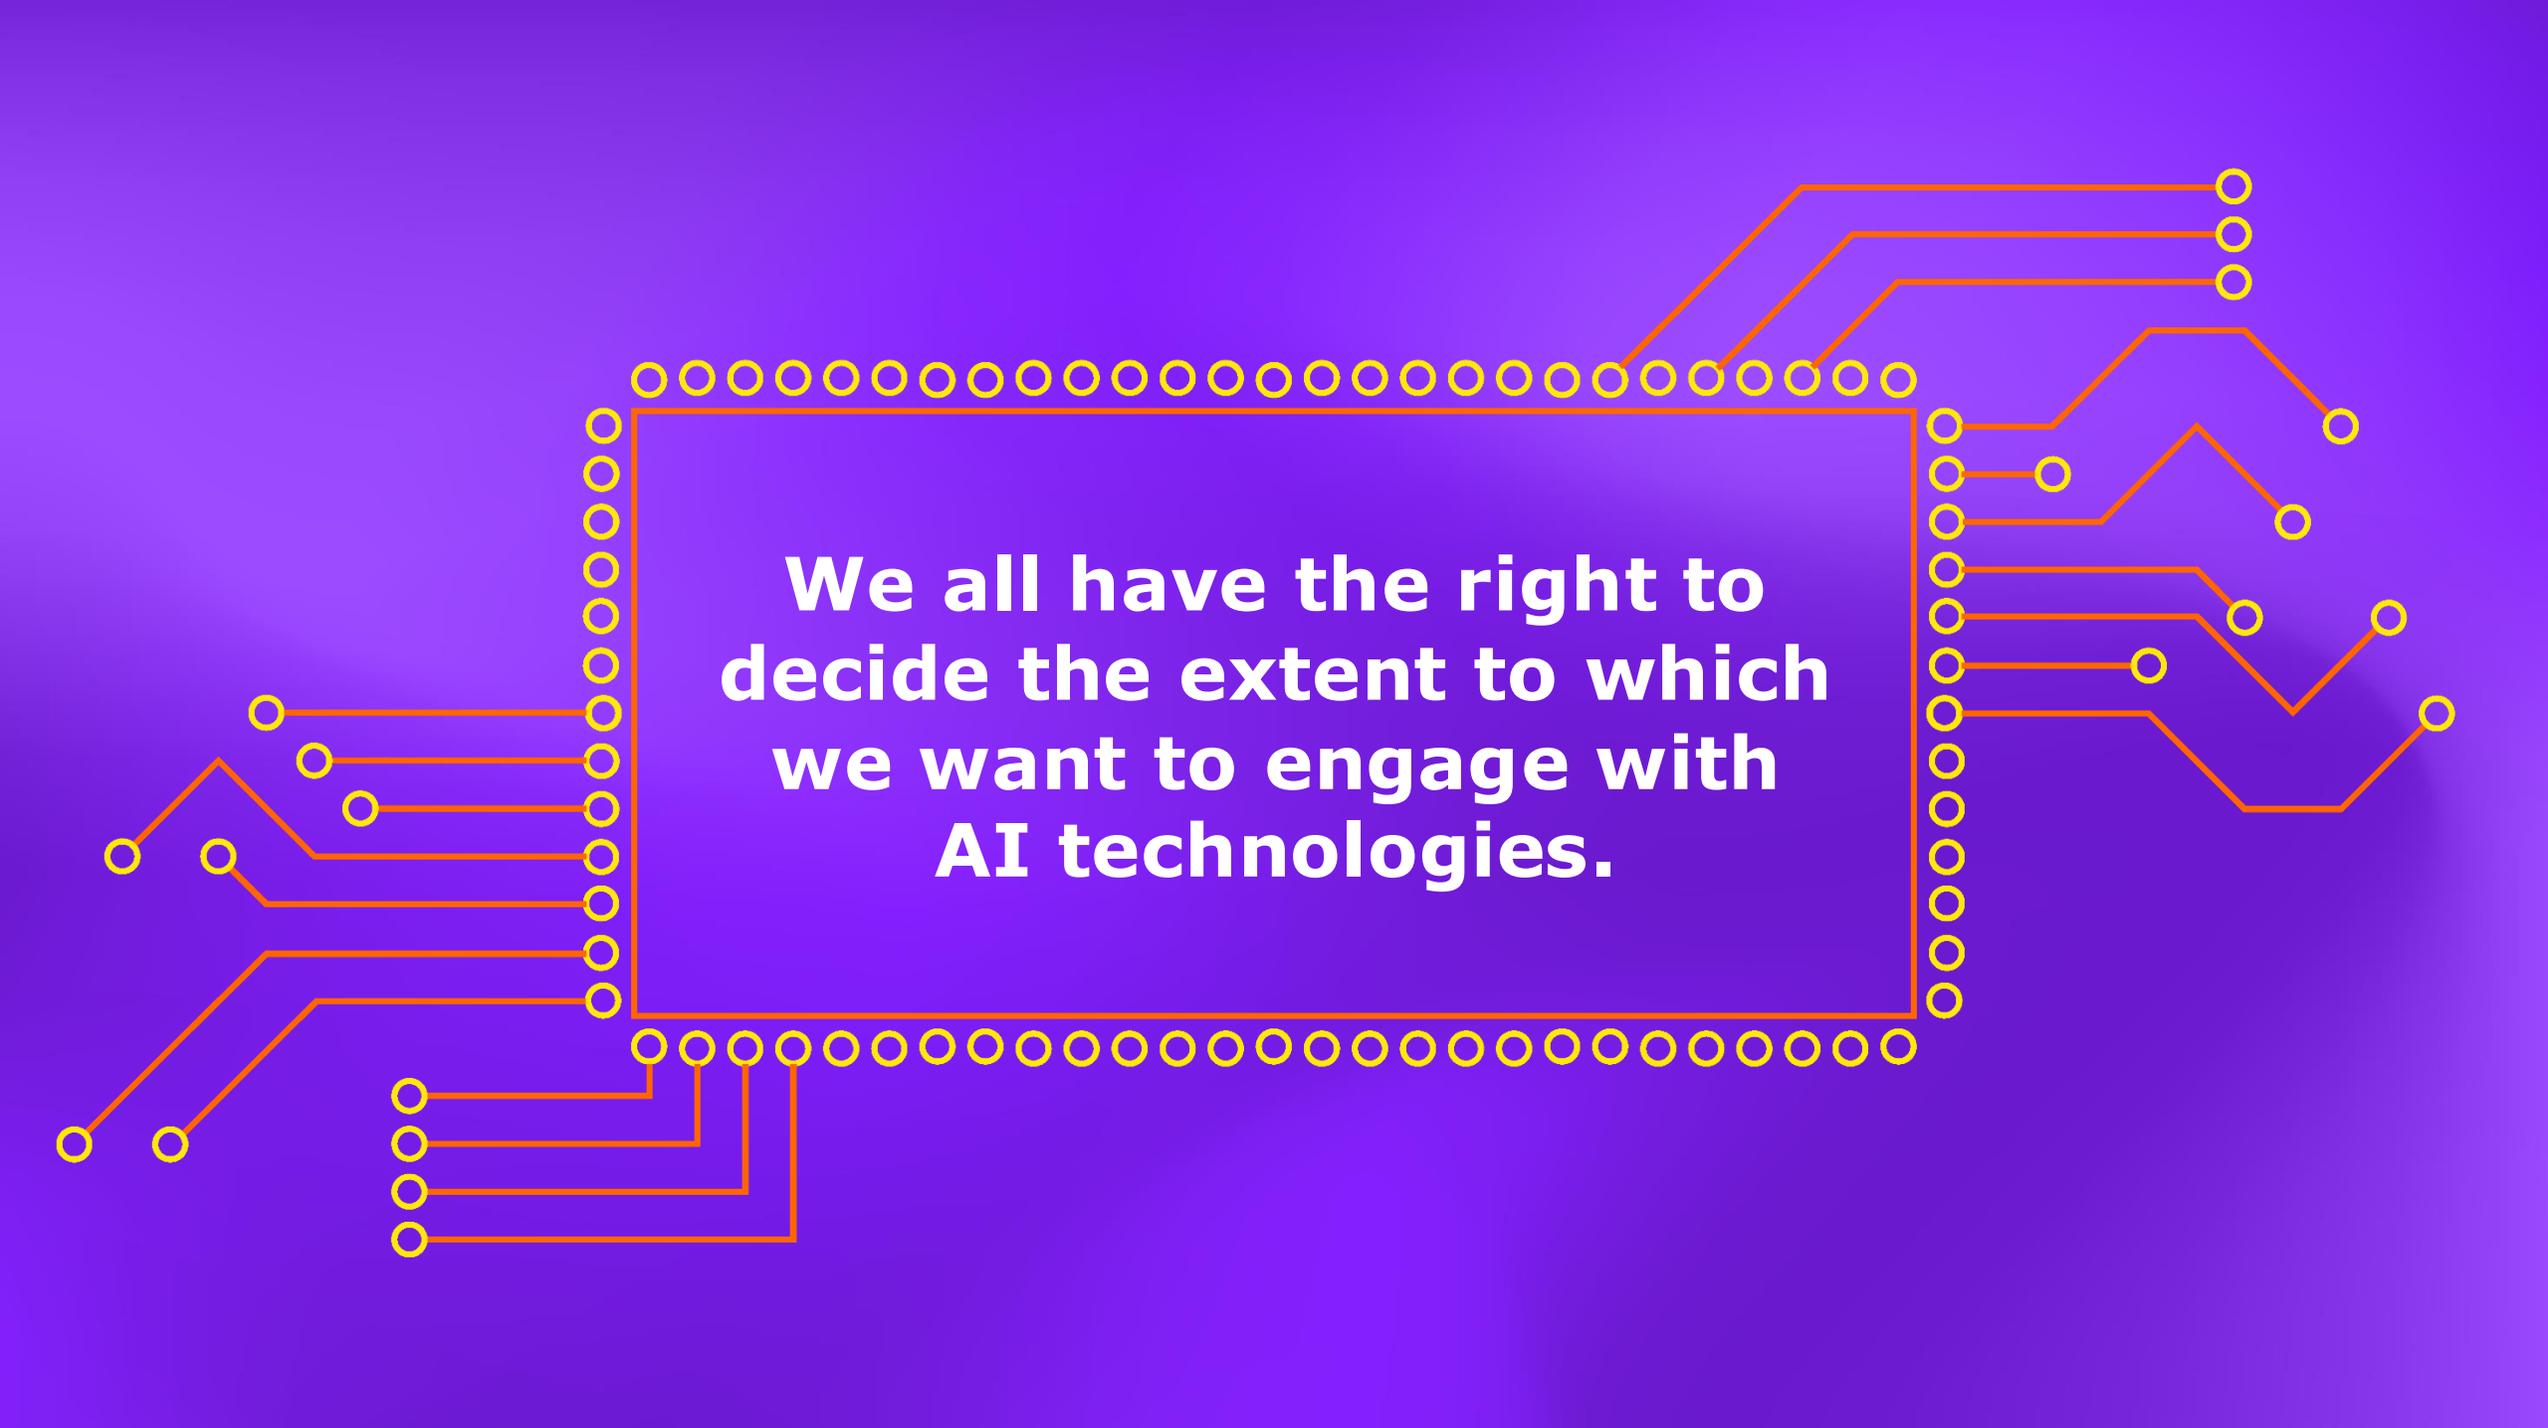

Deepfakes?

Inaccurate advice?

Environmental impact?

**We all have the right to
decide the extent to which
we want to engage with
AI technologies.**

**Understanding
consent**

**Thinking
critically about
online content**

**Reflecting on
how using AI
makes you feel**

**What does safe and
responsible use of AI
technology mean?**

**Knowing where
to get help**

**Thinking about how
your use makes
other people feel**

**Learning about
the ethics of AI**

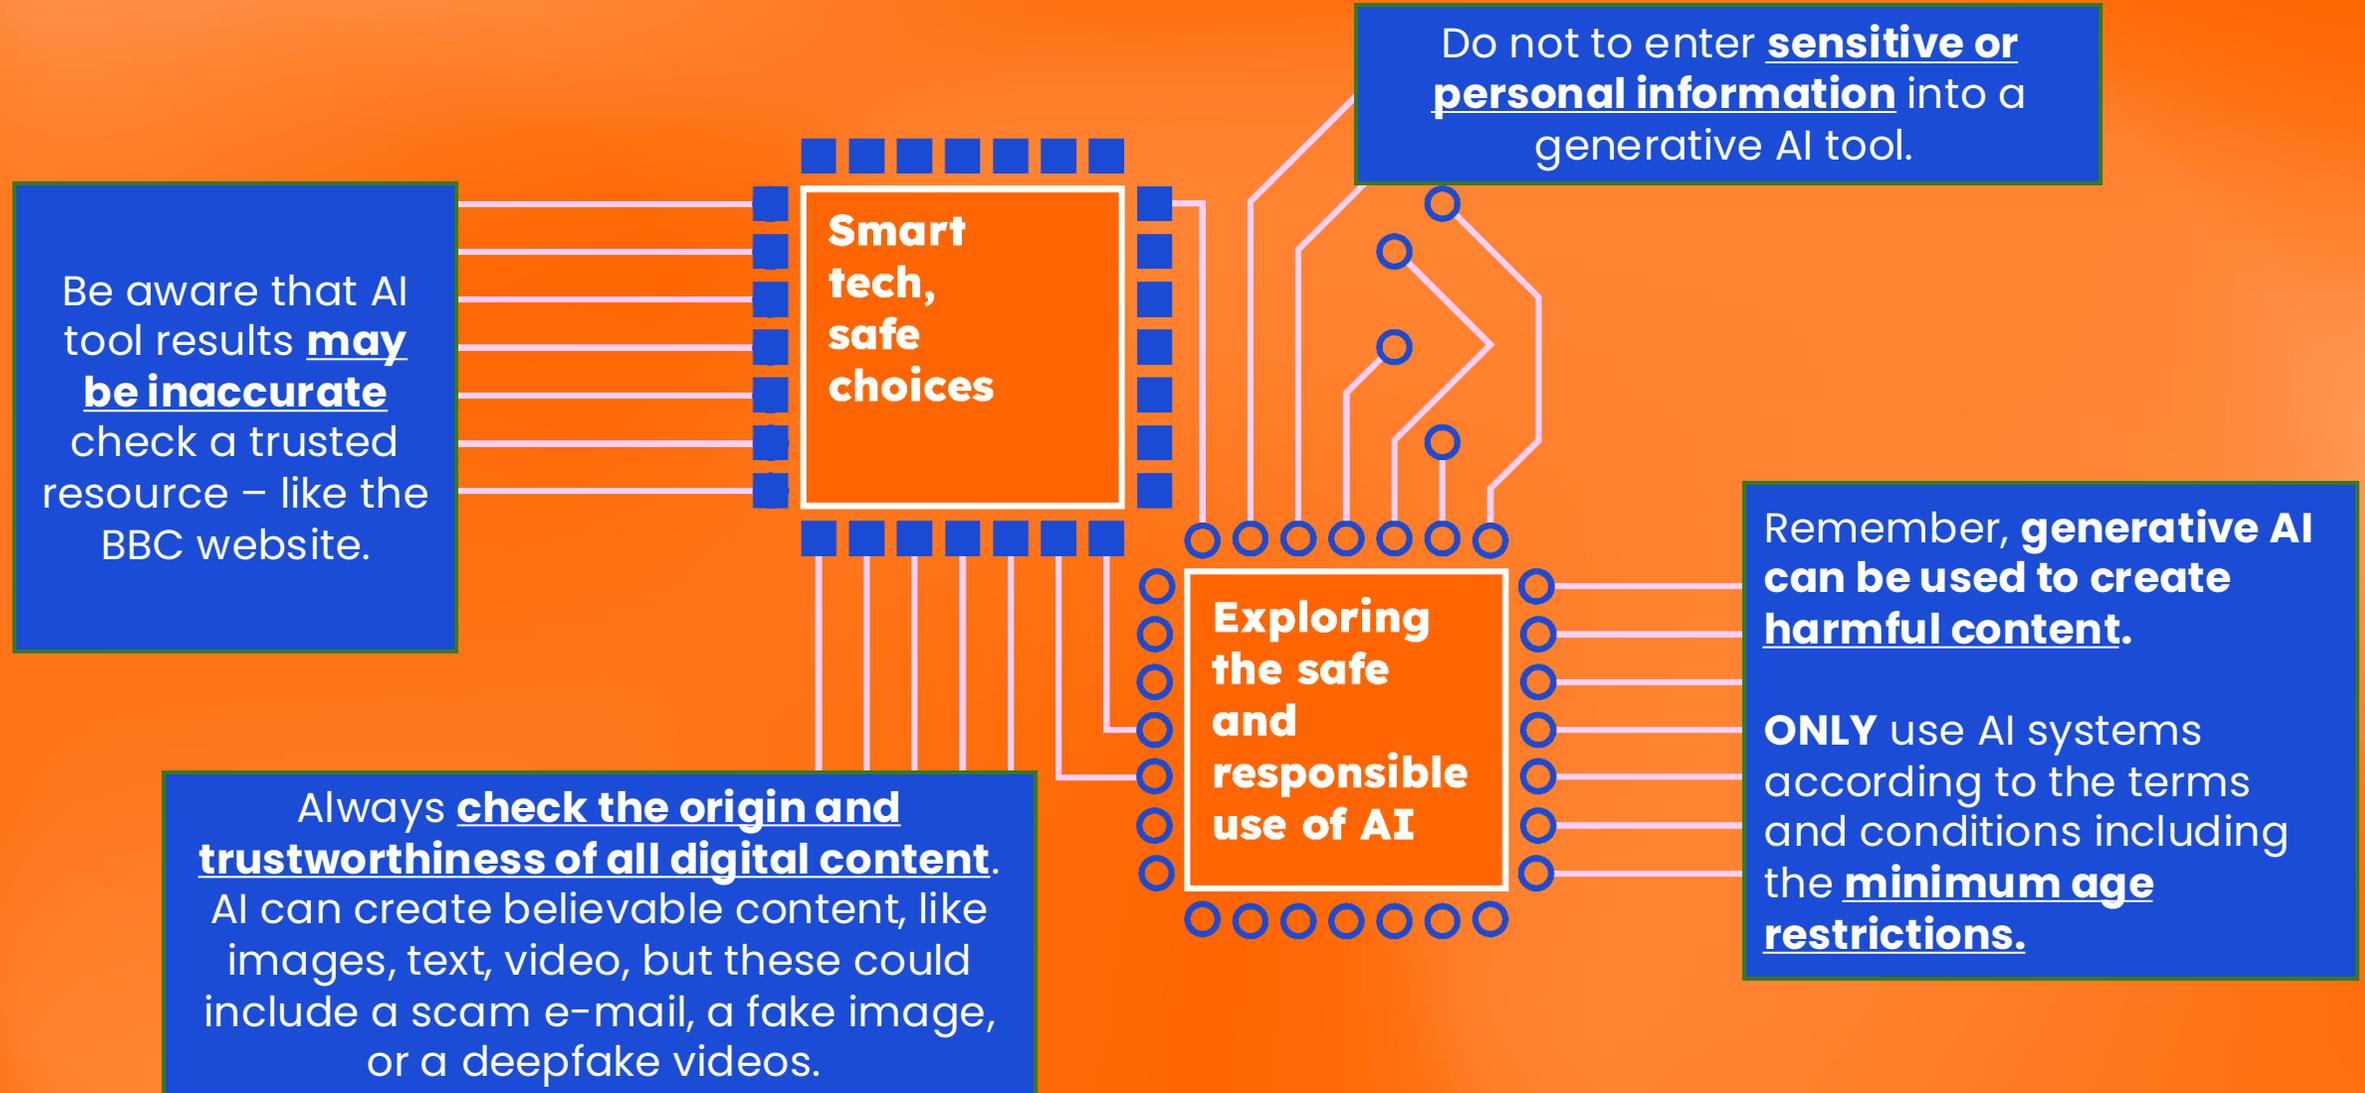

**Thinking about how
your use makes
other people feel**

Using images of someone else and altering them using AI can be upsetting.

However, if you are doing this without their permission or consent, this could lead to serious consequences. The police have specialist teams whose job it is to investigate these crimes and even prosecute where it is deemed that the image created was targeted at an individual and created with intent to cause harm.

Safer Internet Day 2026

Getting Help

Mrs Dunkley

Mr Horton

Ms Vaughan

Mrs Matthews, Miss Barber, Mrs
Parkinson

Your form tutor, teaching
assistant.....in fact anyone at school!

How do you feel about AI?

Do you think it's a force for good?

Or do you have concerns?

And what do you think adults need to know about how AI is impacting your lives?

What support would you like to be able to use it safely and responsibly?

Happy Safer Internet Day everyone!
